ABOUT HETAPRO HVAC

Foshan Hetapro HVAC Equipment Co., Ltd. is one of the High-end heat pump solution provider in China. Hetapro HVAC is mainly responsible for the production, R&D and sales of heat pump water heaters, modular chillers, and high-temperature commercial heat pumps. The factory base is located in Huangpu Industrial Zone, Guangzhou, Guangdong, with a superior geographical location. The factory covers an area of 40000 square meters and consists of four large production workshops, four heat pump test laboratories, two grant warehouses with loading and unloading platforms.

With the support from Devotion Group, Hetapro heat pump has achieved rapid development in recent years. It has successively launched the heat pump Thermax series, includes R32 Cooling heating and DHW heat pump with both split and monoblock type, R290 monoblock heat pump with 75°C hot water ; also the R32 DC inverter swimming pool Polar series, as well as R32 DC inverter commercial hot water Commax series and R32 DC inverter modular chiller Vandin series, which have been recognized in the heating field of business globally.

What is a Heat Pump?

Heat pump water heater is a kind of high-efficiency and energy-saving hot water equipment. It adopts advanced heat pump technology to convert low-temperature heat in the air into high-temperature heat energy, and provides users with a large amount of constant-temperature hot water. Heat pump water heaters bring comfort and convenience to your life.

Hetapro Thermax Heat Pump

Hetapro Thermax Air to Water Heat Pump is a sustainable, low-carbon heating solution for your home. While most other heating systems rely on fossil fuels, Hetapro utilizes renewable sources of energy to generate heat by combining 25% electricity and 75% outside air, making Thermax heat pump a green alternative to your old boiler.

How a Heat Pump works?

Products Overview

MR. HYBRID SERIES

Mr. Hybrid, the ultimate solution for efficient home climate control. By seamlessly integrating advanced heat pump technology with a gas boiler, Mr. Hybrid ensures optimal performance by dynamically switching between energy sources based on current conditions. This intelligent system provides consistent heating, cooling, and hot water while minimizing energy consumption and costs. Experience unparalleled comfort and efficiency with Mr. Hybrid's innovative approach to home climate management.

Indoor Wall Mounted R290 Hybrid Heat Pump

NEW

Featured Highlights

Natural Refrigerant

GMCC DC inverter compressor with R290 natural refrigerant(GWP=3)

A++

Energy efficiency (35°C) Up to A++

75°C(167°F)

Powerful heating with leaving water temp. up to 75°C

No F-Gas License Needed

Enjoy simplified installation with no special certification required

Quick Installation & Easy Maintenance

Simplified processes mean installers save time and resources

Space-Saving

Compact design eliminates outdoor units and piping for a clean, efficient setup

Products Overview

HEATIX SERIES

Hetapro's newest addition to its HEATIX heat pump line-up, the HEATIX Mono R290, offers a new home solution for residential homes. The HEATIX Mono R290 uses R290 as its refrigerant. R290 has a much lower Global Warming Potential (GWP) of only 3 when compared to other refrigerants R32 and R410A. According to the new EU F-Gas regulations, refrigerants must not exceed 150 GWP from 2025.

R290 MONO Heat Pump

NEW

7 / 9 / 13 / 15kW

18 / 21KW

Featured Highlights

GPW=3

R290 natural refrigerant has a lower Global Warming Potential (GWP) index than other gases. Specifically, the GWP usage of R290 refrigerant gas is 3 while R32 is 657, and R410A is 2088.

A+++

ErP level: A+++ (35°C)

-35°C(-31°F)

Continuous operation as cold as -35°C

80°C(176°F)

Powerful heating with leaving water temp. up to 80°C

DC Inverter Technology

DC Inverter Compressor, DC Inverter water pump, DC Inverter fan

PV Ready

Photovoltaic energy storage system (Optional) The photovoltaic energy storage system(PESS) allows household roof to be covered with photovoltaic panels, turning solar energy into household electricity.

Products Overview

THERMAX SERIES

Introducing the Thermax R32 Monobloc—a compact, eco-friendly heat pump delivering efficient heating and cooling. With hot water heating up to 60°C, it operates seamlessly from -25°C to 43°C. Certified with ErP A+++ (35°C), it offers a modulation range of 8 to 16kW. Smart features include multi-zone control, remote management via Wi-Fi and 4G, and real-time power consumption monitoring.

R32 MONO Heat Pump

6 / 8 / 10 / 12 / 14 / 16KW

R32 Split Heat Pump

6 / 8 / 10 / 12 / 14 / 16KW

Featured Highlights

A+++

ErP level: A+++ (35°C)

-25°C(-13°F)

Continuous operation as cold as -25°C

60°C(140°F)

Powerful heating with leaving water temp.

POOLAR SERIES

The Poolar series is a flagship pool heat pump product under Hetapro. The Poolar series can cover swimming pools of 50-500 square meters, with single modules ranging from 7kw to 28kw.

R32 Pool Heat Pump

Featured Highlights

R32

GMCC R32 DC inverter Compressor

EEV

EEV control, precise and stable

Anti-Corrosion

Spiral titanium tube, high efficiency

HYDRO SPLIT SERIES

The Hydro Split is an all-in-one water system that includes a water tank, buffer tank, and expansion tank. This eliminates the need for separate water system installations, making it a convenient option for brand owners and distributors.

All-in-One Water System

Featured Highlights

Integrated Water System

Streamlined Installation, just connect the water pipe to use

150/200/250L

Domestic hot water tank

60/90L

Buffer tank

DC Inverter

12m DC Invertor Water Pump

18 / 20 / 22KW

Air to Water Heat Pump

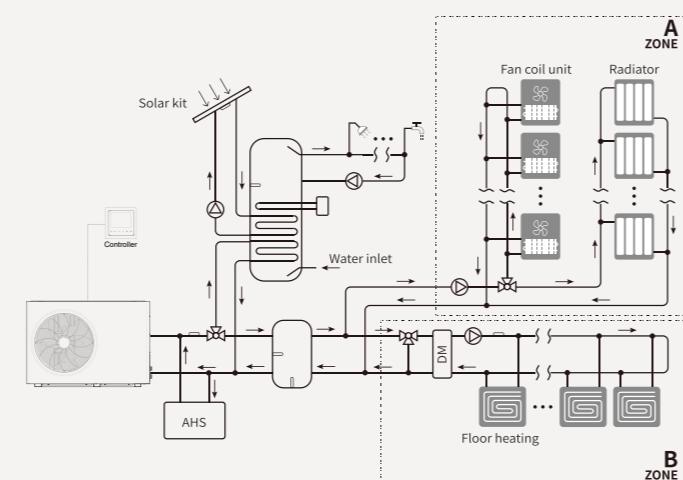

ATW Heat Pump Features

A one-page overview

Comprehensive HVAC Solution: Combining Heating, Cooling, and Hot Water

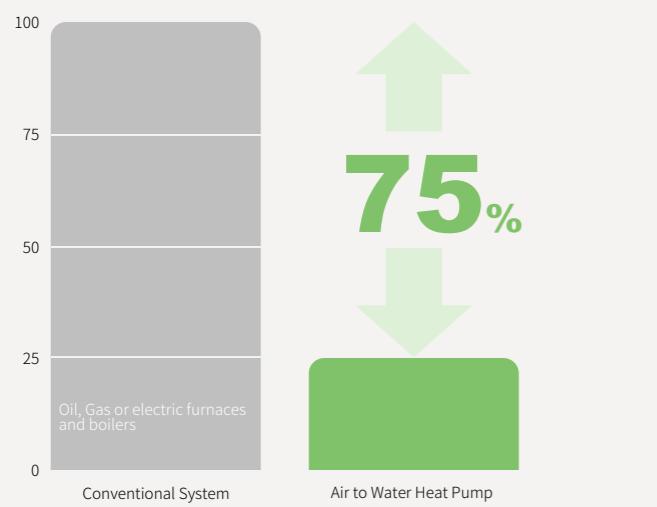

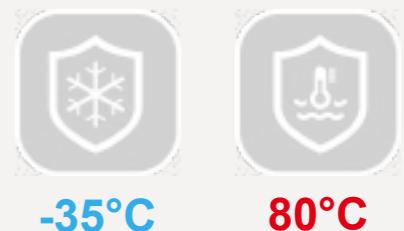

All in One Solution for Any Application

Thermax/Heatix air to water heat pump is not only supplies hot water for fan coil, floor heating system, domestic water tank, but is also compatible with the solar collector, gas furnace, boiler and other heat sources.

-35°C Reliable Operation 80°C Powerful Heating

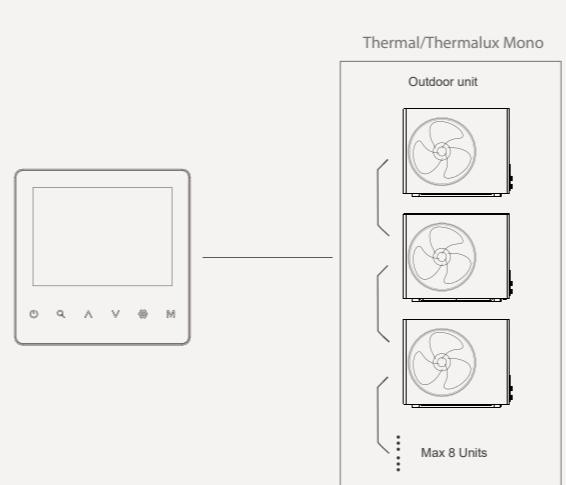

The Heatix R290 Series outperforms it by offering up to 80°C and functioning reliably at even -35°C.

75% Energy Saving

The term "heat pump" refers to a technique that pumps heat from renewable energy sources, like the air, ground and water. A heat pump device transforms this energy into a usable heat source via the refrigerant cycle.

With Heatix heat pump technology about 75% of the energy needed to provide heating and hot water comes from a natural air source.

8 Units in Parallel

Maximum 8 units controlled by one controller with automatic addressing(For Thermax series Mono and Thermalux series Mono)

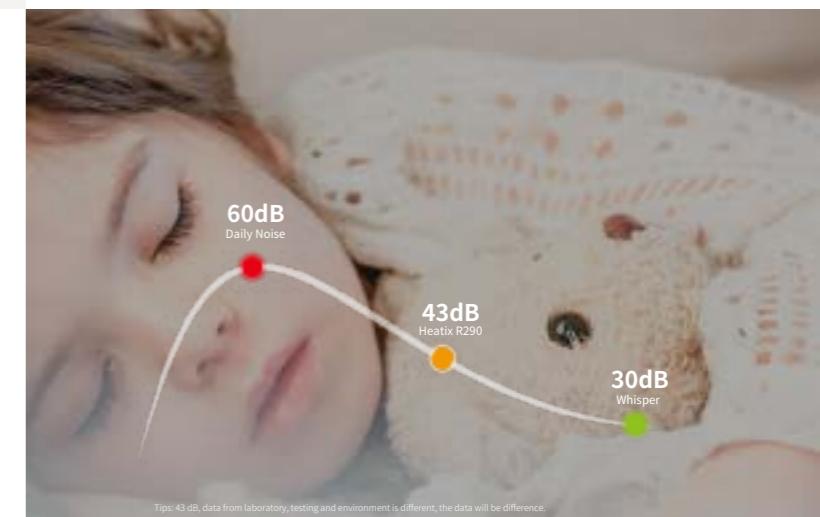

All DC Inverter Components

Heatix air to water heat pump machine adopts well-known brand components in the industry, such as GMCC/Toshiba DC inverter compressor, Panasonic/Toshiba DC inverter fan motor, SHIMGE DC inverter water pump, Heatwell PTC heater(Mono B Series), multi-stage electronic expansion valve components, which can make the unit operate efficiently and stably.

Ultra-Quiet

In silent mode, the operating noise of the equipment can be as low as 43dB(A) within 1 meter, providing customers with an ultra-quiet environment. The compressor is wrapped in a soundproof material, which reduces the operating noise of the compressor.

Multi-functional Controller

Holiday Mode

Just have fun!

Have peace of mind knowing that your home is being protected from potential damage caused by frozen pipes, while also saving on energy costs in an effective and safe way!

Neural Network

Intelligence Algorithms

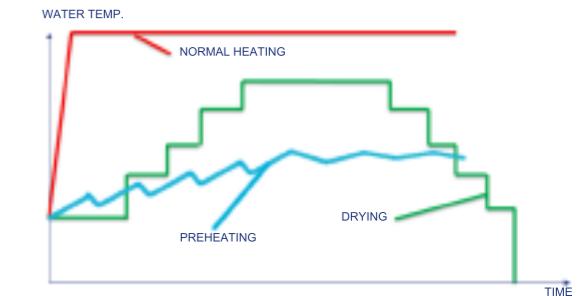

The defrosting logic of the machine is designed very intelligently, utilizing algorithms and learning through neural networks to continuously monitor changes in temperature difference in real-time to determine whether defrosting is necessary. It can operate continuously in winter, ensuring continuous hot water supply.

Triple Defrost Programmes

- AI Defrosting
- Segmented defrosting of fins
- Regular defrosting

Floor Dry up

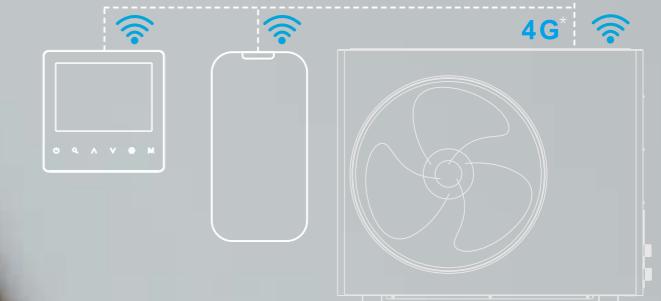

Preheating & Drying Floor

It gradually and evenly increases the temperature of the underfloor, avoiding warping or even cracking during the heating process by excessive moisture on the floor.

IOT Cloud Service

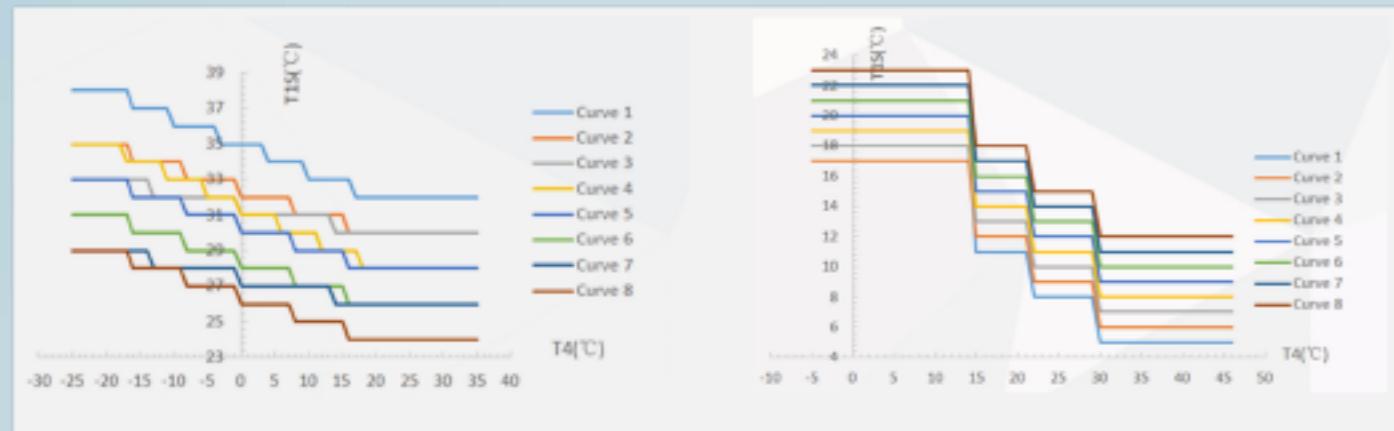

Smart Connect Control Everywhere

Remote control: control your device or equipment easily and freely
Multi-device support: multiple devices can be added at the same time, with one APP can control multiple devices
Precise timer: set timers to perform accurate timing tasks

*Tips: 4G function is optional

Intelligence Comfortable Temperature Manager

Heating Climate Curve

There are a total of 32 climate curves (16 cooling curves+16 heating curves) for users to choose from, and there are also 2 curves (1 cooling curve+1 heating curve) for users to customize.

Cooling Climate Curve

After selecting a certain climate curve, the target water temperature of the unit will be automatically set based on the outdoor ambient temperature (using different set water temperatures at different ambient temperatures will be more comfortable and energy-saving)

Electricity Consumption Statistic Analysis

This function allows the user to analyse the heat pump's electricity consumption at different time intervals and optimise its settings to save even more in terms of heating costs.

() Automatic Matching Smart Grid Control

The heat pump adapts to different electrical signals. The energy consumption of the system can be automatically adjusted based on peak and low power, minimizing heating costs. With this feature, the pump will automatically start to utilize cheaper energy prices or store excess electricity from the photovoltaic system.

Specifications

MR. HYBRID SERIES

R290 Mono Indoor Hybrid Air to Water Heat Pump

Model	/	HWHRHP05SR3-A
Power Supply	V/Ph/Hz	220-240V~ 50Hz

Swimming Pool Heat Pump

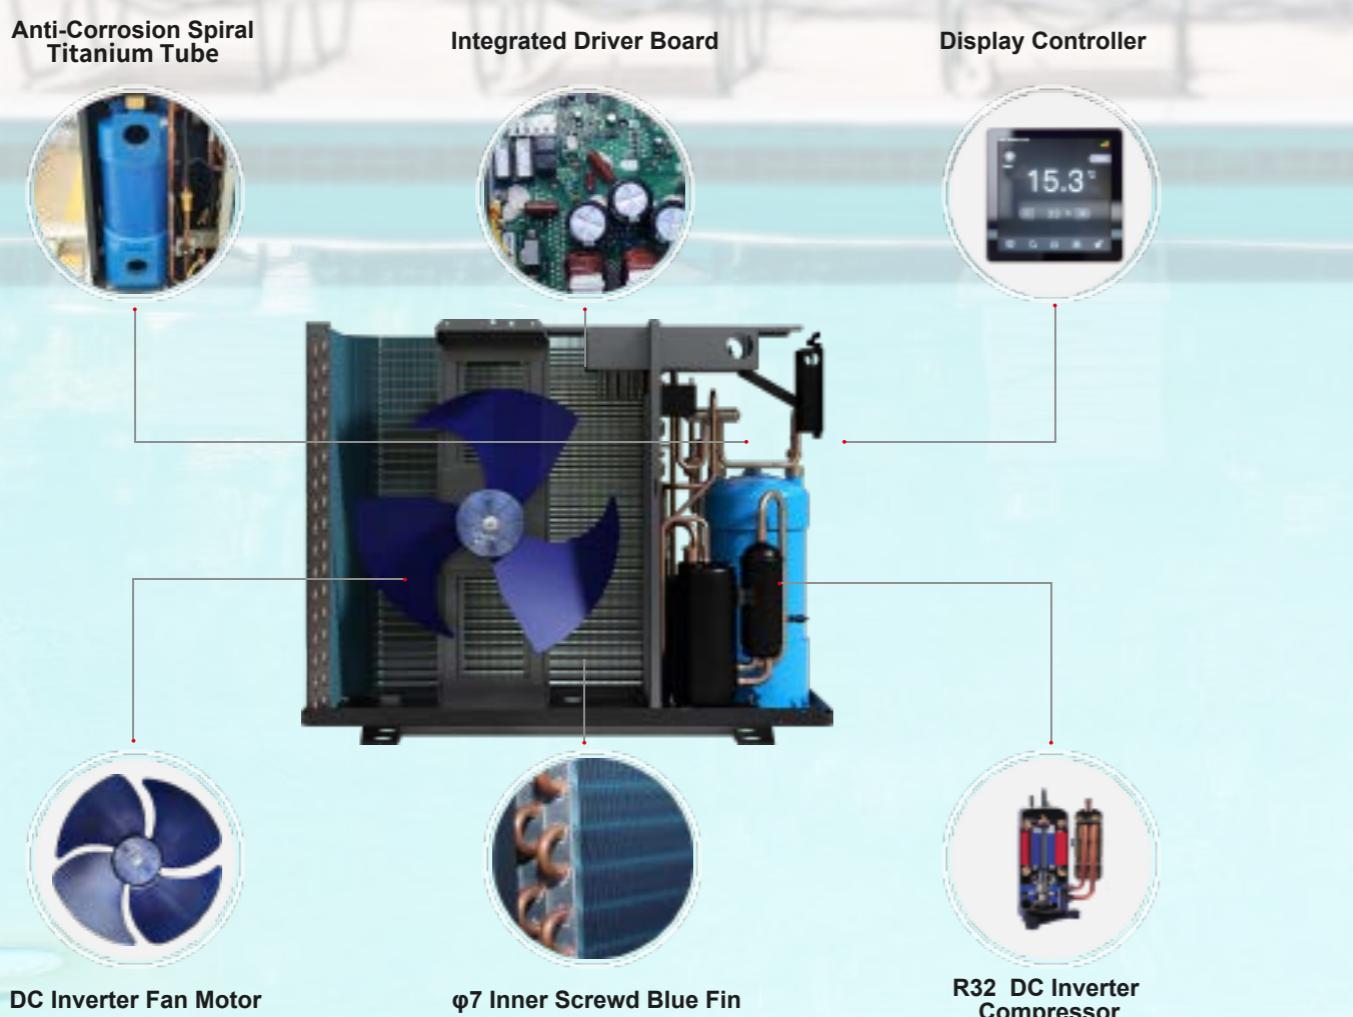

POOLAR SERIRS

Pool Heat Pump Features

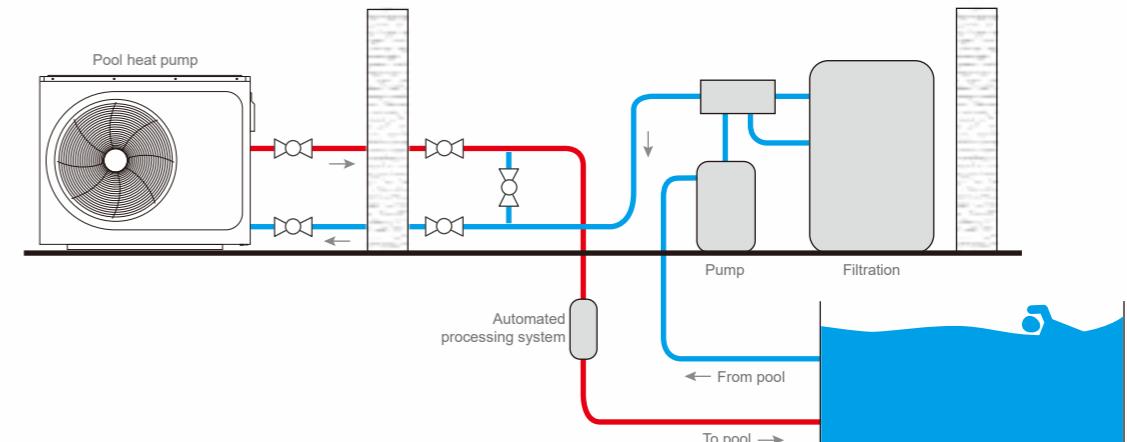

Poolar Series

The Poolar series heat pump is equipped with an optional 4.1 inches intelligent color touch screen multilingual remote control, with rich control functions to ensure the perfect operation of the machine under different temperature conditions and meet the different control needs of users. At this point, the optional WiFi, 4G, and APP functions meet users' remote control of machines and intelligent energy management.

Gross Weight	kg	62	64	66	85.6	88.6	93.6
Water Proof					IPX 4		
Stuffing Quantity 20GP/40HQ				72/144		44/132	

Notes:

1.Relevant EU standards and legislation: EN14511; EN14825; EN50564; EN12102; (EU) No 811/2013; (EU) No 813/2013; OJ 2014/C 207/02.

2.Seasonal space heating energy efficiency class tests in average climate conditions.

3.Sound power test condition: EN12102-1

DHW: Domestic hot water.

Hydro Split Water System

Hydro Split Series

● Compact Design

Compact design, can be integrated into the kitchen cabinet

● Buffer Tank

Buffer tank of 60 liters and domestic hot water tank of 250 liters made of high-quality Duplex stainless steel is a standard component of the Hydraulic System cabinet.

● 3.5-inch Smart Controller

The built-in touch-sensitive, multi-functional LCD color display controller allows for intuitive management of the heat pump operation.

● Easy Installation

Thanks to this integrated system, users do not need to install a separate water system.

Specifications

Components	Specs.	QTY
Water tank	150/200/250L, SUS304(Optional)	1
Buffer tank	60/90L, SUS304(Optional)	1
Exhaust valve	Auto release	1
3-way valve	Electric type	2
Pressure switch	0-10bar	1
E-heater	3kW, 220V~50Hz	1
Water pump	12m DC invertor	2
Wired controller	4.1 inch touched screen	1
Indoor PCB	HETA	1
Temperature controller	Manual operation	1
Temperature controller	Auto type	1

System Schematics

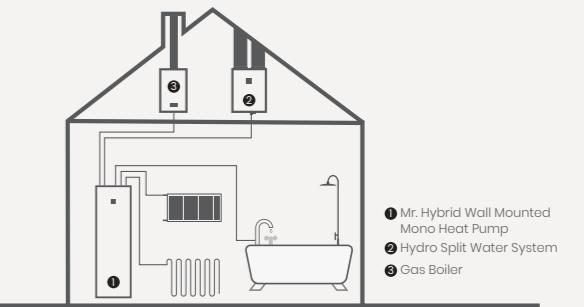

Outdoor Mono

HeatiX Mono or ThermaX Mono can be connected to a Hydro Split, which then centrally distributes hot water to rooms with different water temperature requirements, such as floor heating, radiators and domestic water.

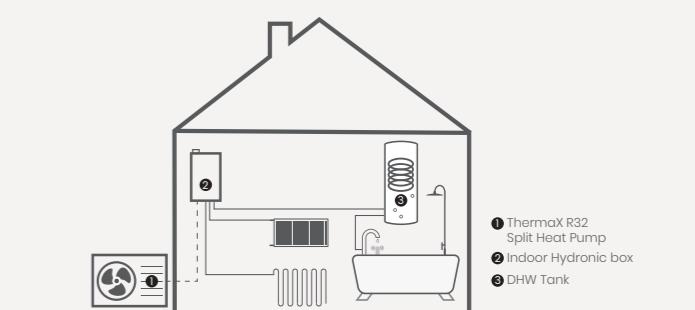

Indoor Mono Hybrid

Mr. Hybrid Mono can be linked with the gas furnace and can be set to use a heat pump or gas furnace for heating according to changes in ambient temperature.

Split

Thermax R32 Split is a ducted system, and the outdoor unit needs to be connected to the refrigerant circuit of the indoor unit.

AquariuX All-in-One Series

R290 All-in-One Water Heater

- R290 Refrigerant:**

R290 is well known as a zero ODP value, which means that this R290 heat pump water heater has no negative impact on the ozone layer.

- Higher COP:**

The AquariuX R290 All-in-One Water Heater can achieve COP up to 4.0, which can reduce energy consumption and save your bills in the long run.

- Wide range to choose:**

We have 200L, 250L and 300L floor standing models for kinds of demands for various families .
